| Title: | BLIIoT|New Version BL120 Modbus Gateway Find Appli |

## Description

Price: $ 42.55

Description:

**Introduction**

Modbus gateway is an essential component in industrial automation and control systems. It enables seamless communication, integration, and scalability, which are critical for the efficient operation of modern industrial systems. It plays a crucial role in facilitating communication, integration, and scalability between devices and systems that use different protocols.

**Product Description**

BL120 gateway acts as a bridge between the Modbus devices and the target system, enabling data exchange and interoperability. It allows for communication between devices such as sensors, actuators, and controllers over serial or Ethernet connections.

By utilizing BL120 Modbus gateway, organizations can integrate Modbus devices with other systems or networks, enabling seamless interoperability and advanced management and control capabilities.

**Product features**

1. Supports connection to up to 50 devices and collection of 4,000 data points.
2. Supports 6 RS232/RS485 optional inputs.
3. It adopts embedded ARM MCU and is a product developed based on Linux OS system.
4. 2 Ethernet ports (WAN port and LAN port).

5. Support 4G, WiFi, GPS.
6. Support OpenVPN, SNMPV1/V2.
7. It supports routing functions and cascade switch data collection to facilitate the collection of more industrial equipment data. The software has complete functions and covers most common application scenarios.
8. It integrates the humanized configuration interface that BLIIoT adheres to, as well as remote configuration, remote firmware upgrade and other functions. Users only need to make simple settings.
9. It adopts a fastening structure and has a power supply design with anti-reverse connection protection.
10. It adopts
