Listing details

Title:	BLIIoT| New Version BL120PM PLC to Modbus Gateway

Description

Price: $ 42.55

Description:

Introduction

A PLC to Modbus gateway is a device that allows communication between a programmable logic controller (PLC) and a device or network that uses the Modbus communication protocol. The gateway acts as a bridge between the two systems, translating the data from one protocol to the other so that they can communicate with each other.

Product Description

BL120PM PLC to Modbus gateway can be used to connect a PLC to a Modbus device or network, enabling the exchange of data between them. The gateway can translate the data from the PLC's communication protocol to the Modbus protocol and vice versa, allowing the devices to communicate seamlessly with each other.

Product features

1. Supports PLC remote debugging upload and download.
2. Supports Siemens, Mitsubishi, Omron, Delta, Modbus RTU, Modbus TCP, Modbus cloud.
3. Supports connection to up to 50 devices and collection of 4,000 data points.
4. Supports 6 RS232/RS485 optional inputs.
5. It adopts embedded ARM MCU and is a product developed based on Linux OS system.
6. 2 Ethernet ports (WAN port and LAN port).
7. Support 4G, WiFi, GPS.

8. Support OpenVPN, SNMPV1/V2.
9. It supports routing functions and cascade switch data collection to facilitate the collection of more industrial equipment data. The software has complete functions and covers most common application scenarios.
10. It integrates the humanized configuration interface that BLIIoT adheres to, as well as remote configuration, remote firmware upgrade and other functions. Users only need to make simple settings.
11. It adopts a fastening structure and has a power supply design with anti-reverse connection protection.
12. It adopts BLIIoT's patented rai
