

## BL100 Industrial iot 4g gateway

### Seller Info

Name: Chriswu  
First Name: Chriswu

### Listing details

Title: BL100 Industrial iot 4g gateway

### Description

Description:

BL100 is a Modbus to MQTT gateway based on cellular network. It supports Modbus RTU, Modbus TCP, MQTT, Alibaba Cloud, HUAWEI Cloud, King Pigeon Cloud, custom platform and transparent data transmission. Users can connect it to third-party server, cloud platform and SCADA easily. With built-in industrial GSM/GPRS/3G/4G communication module, BL100 has integrated stable and reliable 32-bit MCU based on embedded uCOSII real time operation system. It supports Modbus Slave and Modbus Master with up to 320 extended datapoints for data collection. Users can configure high/low limit parameters according to various application requirement. If any threshold is triggered, device will send notification to users via SMS and transmit the data to monitoring center without operator on-site check.
