

BL101 Modbus to OPC UA gsm gateway

Seller Info

Name: Chriswu
First Name: Chriswu

Listing details

Title: BL101 Modbus to OPC UA gsm gateway

Description

Description:

BL101 is IoT gateway which can be used to convert Modbus, DLT645 to MQTT, OPC UA, Modbus TCP protocols, and then connected to cloud platform through 4G or Ethernet. It can be connected to HUAWEI Cloud, Alibaba Cloud, Thingsboard, AWS and other cloud platforms. It has one RS485 interface, and it can collect 4,000 data points from 100 devices at the same time. It also has VPN network security, TLS SSL data encryption, and data supplementary transmission functions.

Location

Country: United States
State/Region/Province: California
Address: 303-305,B Building, Huafeng International Robot
Industry Park Baoan
District,Shenzhen,518126,China
City: French Camp
ZIP code: 51812

Additional information

Additional Information:

BLIIOT specializes in LTE Industrial Router, Industrial IoT Gateways, IIOT Gateways, 4G Industrial Router, Cellular RTU, 4G RTU, PLC Gateways, Modbus gateways, R&D and manufacturing of edge computing gateways, , MQTT gateways, OPC UA gateways, 4G industrial edge routers, industrial IoT gateways, industrial Ethernet IO modules, industrial IoT edge controllers OEM ODM Since 2005. 400,000 + Accumulation of customers from different countries and regions.
