

R10 Modbus to WiFi gateway, ZAR 102.30

Seller Info

Name: Chriswu
First Name: Chriswu

Listing details

Title: R10 Modbus to WiFi gateway

Description

Price: ZAR 102.30

Description:

B

Location

Country: China

State/Region/Province: Guangdong

Address: 303-305,B Building, Huafeng International Robot
Industry Park Baoan
District,Shenzhen,518126,China

City: Shenzhen

ZIP code: 51812

Additional information

Additional Information:

Router industrial router is an industrial IoT high-speed router, compatible with 4G/3.5G/3G/2.5G network, flagship configuration, VPN link, industrial protection, wide temperature, wide voltage design, easy to set up high speed, stable The wireless transmission network uses the public LTE network to provide users with wireless long-distance data transmission, It is with 4 AI+2DI+2DO for options,can be used in multiple industrial applications. It is an industrial-grade multifunctional Internet of Things terminal device that supports POE power supply, comes with IO input and output, with 2 serial ports, supports transparent transmission, Modbus Master protocol for expanding IO and connecting PLC and other devices. It adopts dual SIM card redundancy design to ensure stable and reliable data transmission, supports MQTT protocol and Modbus protocol, and is compatible with most PLC protocols, greatly simplifying on-site wiring construction costs and reducing operation and maintenance costs. High-performance industrial-grade cellular router adopts 32-bit processor, developed based on Linux system, supports GSM/2G/3G/4G/GPRS/EDGE/WCDMA/HSPA+/LTE network, provides high-speed wireless network bandwidth for the device through wireless connection, and has automatic detection of network disconnection, automatic restart of dial-up failure, and scheduled restart to ensure network Stable connection.
